REMARKS

This is UNEVALUATED Information

25X1

1. The aluminum foundry at Inota (P 43/D 89), also referred to as "Alkohó Inota", is a state enterprise under joint Soviet-Hungarian administration. It was subordinate to the Ministry of Metallurgy and Machinery at 5/6 Szabadság tér in Budapest. Work on the construction of the plant was started in the spring of 1951; the enterprise is scheduled to be completed in 1955. The installation is located about 150 meters east of the power station, 2 km. east of Inota, on the Veszprém (P 43/D 78)- Székesfehérvár (Q 43/Z CO) highway. Conspicuous landmarks near the plant are the rocky top of Mount Baglyas and the tower-like building of the power station west of it. The aluminum plant has railroad connection via the spur track of the power plant; access by road is via the Veszprém - Székesfehérvár highway.

25X1

2. The aluminum produced at the plant was shipped by rail in 50-kg to 25-kg ingots. Most of the aluminum was shipped to the USSR. From 45 to 50 railroad carloads of alumina packed in paper bags arrived daily from the alumina works at Ajka (P 43/D 48). In the spring of 1953, a total of 40 aluminum crucibles were in operation. The work force amounted to 600 to 700 men. After the plant has reached its scheduled capacity its work force will be increased to about 3,000. Work was done in three shifts. Plant manager was a Soviet major, Hungarian manager was one Szanyi (fmu).

25X1

3. The plant could be entered only after presentation of a special pass with a photograph of the bearer. The installation was guarded by about 35 factory police who wore black uniforms. The construction of civil defense facilities is envisaged.

blow of

A hand-drawn floor plan of a house featuring a central vertical staircase. The plan includes several rooms, some with specific numbers:

- Room 1: Located at the top left.
- Room 2: Located to the right of Room 1.
- Room 3: Located above the central staircase.
- Room 4: Located below the central staircase.
- Room 5: Located to the right of the central staircase.
- Room 6: Located to the right of Room 4.
- Room 7: Located above Room 4.
- Room 8: Located to the right of Room 7.
- Room 9: Located at the bottom left.
- Room 10: Located to the right of the central staircase.
- Room 11: Located to the right of Room 10.

The plan also shows various doorways and windows indicated by lines and small rectangles.
